

## **Thursday 27th January 2021**

**LI: To use the punctuation of bullet points in a list.**

### Success Criteria:

- I know that a colon introduces the list and semi-colons separate lengthy items in the list and each new item is on a new line with a bullet point.
- I can identify where the colon, semi-colons and bullet points need to be placed.
- I can introduce a list with a colon.
- I can separate lengthy phrases in the list with semi-colons.
- I can put each new item on a new line (beginning with a bullet point).

My favourite meals consist of various different animals:

- deer,
- rabbit,
- goats,
- lizards.

What has the wolf  
done wrong?

## **LI: To use the punctuation of bullet points in a list.**

### Success Criteria:

- I know that a colon introduces the list and semi-colons separate lengthy items in the list and each new item is on a new line with a bullet point
- I can identify where the colon, semi-colons and bullet points need to be placed.
- I can introduce a list with a colon.
- I can separate lengthy phrases in the list with semi-colons.
- I can put each new item on a new line (beginning with a bullet point).

### Model Text

Wolves are majestic creatures that have adapted to living in many parts of the world:

- Germany,
- Russia,
- Japan,
- Canada.

As well as living in many other countries, the wolf has adapted to various habitats, such as forests, grass lands, desert, icy tundra and rocky mountains. Depending on it's habitat, the wolf has many variations in their appearance:

- Thickness of fur,
- Size,
- Colour.

## **LI: To use the punctuation of bullet points in a list.**

### Success Criteria:

- I know that a colon introduces the list and semi-colons separate lengthy items in the list and each new item is on a new line with a bullet point
- I can identify where the colon, semi-colons and bullet points need to be placed.
- I can introduce a list with a colon.
- I can separate lengthy phrases in the list with semi-colons.
- I can put each new item on a new line (beginning with a bullet point).

### Model Text

Wolves are carnivores—they prefer to eat large hooved mammals such as:

- deer,
- elk,
- bison,
- moose.

They also hunt smaller mammals such as beavers, rodents and hares. Adults can eat 20 pounds of meat in a single meal.

## LI: To use the punctuation of bullet points in a list.

### Success Criteria:

- I know that a colon introduces the list and semi-colons separate lengthy items in the list and each new item is on a new line with a bullet point
- I can identify where the colon, semi-colons and bullet points need to be placed.
- I can introduce a list with a colon.
- I can separate lengthy phrases in the list with semi-colons.
- I can put each new item on a new line (beginning with a bullet point).

### Task: Write three paragraphs about wolves, using bullet points for lists.

Don't forget to use a colon!

You can use these ideas to help you write  
Choose three of the following subheadings  
to write paragraphs about:

Where they live

Diet

What to do if you live  
near wolves

Individual  
features

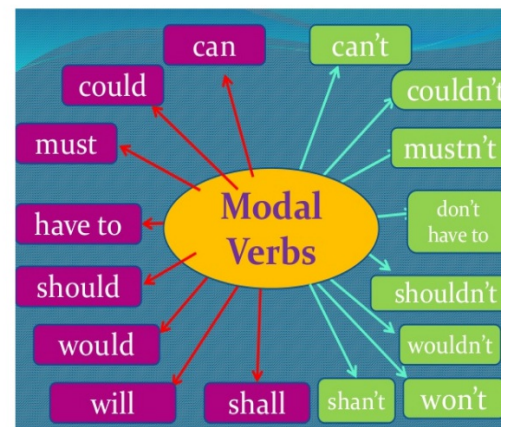

Habitats

Communication

Wolves are carnivores—they prefer to eat large hoofed mammals such as:

- deer,
- elk,
- bison,
- moose.

They also hunt smaller mammals such as beavers, rodents and hares. Adults can eat 20 pounds of meat in a single meal.

### Challenge

Can you include modal verbs, adverbials, expanded noun phrases and parenthesis?

# Plenary

# Self Assessment

Have you correctly punctuated your bullet point list?

Have you included a main clause before your colon?

<i>Success Criteria:</i>	<i>Self Assessment:</i>
<i>I know that a colon introduces the list and semi-colons separate lengthy items in the list and each new item is on a new line with a bullet point.</i>	
<i>I can identify where the colon, semi-colons and bullet points need to be placed.</i>	
<i>I can introduce a list with a colon.</i>	
<i>I can separate lengthy phrases in the list with semi-colons.</i>	
<i>I can put each new item on a new line (beginning with a bullet point).</i>
